

# Interested in a career in the Occupational Health & Safety Field?

The Certificate III qualification will provide you with the practical skills and knowledge to work within the field of occupational health and safety. You will apply a broad range of competencies in varied work contexts, including the identification of hazards, risk assessment and emergency procedures. You will also learn to organise workplace monitoring and provide support to a team. This qualification is for people whose main job is not dedicated to OHS but who take it on as a voluntary duty.

The Certificate IV qualification will provide you with the practical skills and knowledge to apply to a wide variety of OHS contexts. You will learn how to contribute to the implementation of OHS processes in the workplace. You will be able to identify hazards and assess OHS risks, assist with compliance with OHS and other relevant laws, use equipment to conduct workplace monitoring and contribute to the implementation of emergency procedures. This qualification would suit an OHS officer in a full-time dedicated role who works under the supervision of an OHS Coordinator or OHS Manager.

The Diploma qualification will provide you with the practical skills and knowledge to work within the field of occupational health and safety as a supervisor/manager. You will develop skills to coordinate and maintain the OHS program within an organisation. You will develop a sound theoretical knowledge base and use a range of specialised, technical or managerial competencies to plan, carry out and evaluate your own work and the work of others with safety responsibilities.

The employment opportunities available within the Occupational, Safety & Health field include roles such as:  
**Occupational health and safety coordinator / officer. Occupational health and safety coordinator / officer.**  
**OHS manager/ practitioner or senior OHS officer.**
